CONTENTS OF VOLUME XIV

No. 1.

L. ERIKSEN, NORA ERIKSEN and SYNNØVE HAAVALDSEN: The ether soluble porphyrins found in the urine of normal man and rabbit 1

L. ERIKSEN, NORA ERIKSEN and SYNNØVE HAAVALDSEN: The ether soluble porphyrins found in urine in acute porphyria and porphyria cutanea tarda 6

L. ERIKSEN: The nature of the intermediate tetrapyrroles in protoporphyrin and heme biosynthesis 11

Y. KONTTINEN: The effect of heparin on the fibrinolytic activity of streptokinase-activated human plasma 15

Y. KONTTINEN, E. H. KOSKINEN and P. HÄRKÖNEN: On the use of bovine plasma in the determination of fibrinolytic activity by the standard-clot lysis time method 19

R. BLOMSTRAND and F. NAKAYAMA: Application of neutron activation paper chromatographic analysis of phospholipids in clinical investigation 28

T. VARTIO: *d*-Xylose tolerance test 36

S. SYDNES and A. FØLLING: On detection of heterozygotes for phenylpyruvic oligophrenia 44

B. JOSEPHSON, J. BERGSTRÖM, H. BUCHT and E. HULTMAN: On the influence of body water volume and potassium supply on the aldosterone excretion in arterial hypertension 47

J. FINDOR and E. HULTMAN: The effect of glucagon, epinephrine and vasopressine on the plasma concentration and renal excretion of electrolytes in man 59

O. J. BROCH, H. DAHL, J. HAARSTAD and E. HATLETVEIT: A new instrument for the continuous determination of the oxygen saturation and dye-dilution curves in circulating blood 66

L. SUNDBLAD and MÄRTA WALLIN-NILSSON: Electrophoretic determination of orosomucoid 72

Y. KONTTINEN: The effect of streptokinase on the plasma heparin thrombin time 82

Y. KONTTINEN: On the effect of alimentary lipemia and a natural heparinoid on the fibrinolytic system of man 87

EVA HIRSJÄRVI: Effect of inadequate ventilation on respiratory metabolism 100

Technique and Practical Problems:

A. HOLLENDER: A technical improvement in the preparation of starch gel for electrophoresis according to Smithies 104

No. 2.

C. J. AMRIS: Investigations concerning the protaminase activity of serum and plasma 105
C. J. AMRIS and ANNEMARIE AMRIS: The protaminase activity in normal individuals and in medical patients 117
F. KIIL and K. AUKLAND: Renal tubular permeability to radioactive sodium, bromide and iodide isotopes 124
H. J. FAARVANG: The spontaneous individual variations of the normal 24-hours excretion of trypsin inhibitor in urine 132
MARIA PARASKEVAS, INGA MARIE NILSSON and GUNILLA MARTINSON: A method for determining serum inhibitors of plasminogen activation 138
A. DAHLQVIST: A method for the determination of amylase in intestinal content 145
T. LAURSEN: Electrophoresis of serum lactic dehydrogenase on agar gel with fluorimetric determination of the enzyme activity 152
U. V. LASSEN and K. OVERGAARD-HANSEN: Effect of inorganic phosphate and of drugs affecting renal uric acid excretion upon transport of uric acid through the human erythrocyte membrane 157
O. EGEBERG: Blood coagulation in renal failure 163
E. ARENANDER, A. CARLSTEN, G. GRIMBY, L. HALLBERG and H. WESTLING: The volume and distribution of blood in patients with varicose veins 170
B. HALLGREN and A. SVANBORG: The separation of free fatty acids (FFA) from human plasma lipids as chromatographic analysis of the free fatty acid composition in healthy human individuals 179
A. CARLSTEN, B. HALLGREN, R. JAGENBURG, A. SVANBORG and L. WERKÖ: Arterial concentrations of free fatty acids and free amino acids in healthy human individuals at rest and at different work loads 185
A. PARROW: The plasma protein binding of triiodothyronine and its relation to the uptake of I^{131}-labelled triiodothyronine by human erythrocytes *in vitro* 192
H. C. GODAL: A study on the beta naphtol reaction of plasma ("fibrinogen B"-test) .. 203
E. KEMP and INGER RUBIN: Renin purification by DEAE cellulose chromatography .. 207

Technique and Practical Problems:

J. LEHMANN: A new reagent for the decoloration and deproteinization of urine for the polarimetric determination of glucose 212

No. 3.

O. EGEBERG: Blood coagulation and intravascular hemolysis 217
H. C. GODAL: The antiheparin effect of platelets 223
O. EGEBERG: Antihemophilic A factor (factor VIII) and fibrinogen in human blood. A study on the question of a closer correlation between the levels of the two factors .. 230
O. THULESIUS and L. ÅSTRÖM: Comparison of the cube and tetrahedral lead systems for vectorcardiography 235
H. ARNOLDSSON, C.-G. HELANDER, E. HELANDER, S.-E. LINDELL, B. LINDHOLM, O. OLSSON, B.-E. ROOS, A. SVANBORG, B. SÖDERHOLM and H. WESTLING: Elimination of C^{14}-histamine from the blood in man 241
O. EGEBERG: The effect on different clotting factors of short-term treatment with phenylindanedione 247

O. EGEBERG: Clotting factor levels in patients with coronary atherosclerosis 253
I. ØYE: The amount of free hydroxyproline in human blood serum 259
A. RANDRUP: Determination of 3-methoxy-4-hydroxymandelic (vanilmandelic) acid by electrophoresis at low pH 262
P. OLLENDORFF: The nature of the anticoagulant effect of heparin, protamine, polybrene and toluidine blue 267
E. HULTMAN and H. CASTENFORS: An indirect method for detecting increases in the biliary pressure 277
L. JACOBSSON and G. WIDSTRÖM: Separation of iodine compounds in serum by gel filtration 285
L. WERKÖ, R. SANNERSTEDT, E. VARNAUSKAS and G. BOJS: Experimentally induced hypervolemia during ganglionic blockade. The effect on cardiac function in patients with mitral disease 289
O. SIGGAARD ANDERSEN, K. JØRGENSEN and N. NÆRAA: Spectrophotometric determination of oxygen saturation in capillary blood 298
P. OLLENDORF: Estimation of the activation of the thromboplastic system in blood during extracorporeal circulation 303
A. O. HEINONEN, M. J. KARVONEN and E. JÄRVINEN: The reliability of the pulmonary diffusing capacity determination 307

Technique and Practical Problems:

J. KILLANDER and B. ZAAR: Rapid test for ketonuria 311
G. JOHANSEN: Shelf life of a sodium hydroxide solution 315

Letters to the Editors:

L. GARBY: Erythrocyte uptake of labeled triiodothyronine 316
A. RAINA: Spermine and spermidine in normal human blood 318
J. FOG: Calibration of the wavelength scale on spectrophotometers by "the indicator method" 320

No. 4.

G. GRIMBY and B. SÖDERHOLM: Energy expenditure of men in different age groups during level walking and bicycle ergometry 321
H. CASTENFORS, L.-G. EKELUND and H. HOLMGREN: Effect of ingestion of hyperosmotic glucose solutions on the systemic and splanchnic circulation in partially gastrectomized patients with histories of dumping syndrome 329
M. ANDERSEN: Function of the totally denervated rabbit kidney with special reference to urea excretion and renal blood flow 343
R. WENNESLAND, E. BROWN, J. HOPPER, JR., K. G. SCOTT, J. L. HODGES, JR. and B. BRADLEY: Experiences with the radiochromium method for determination of red cell volume 355
E. HAAHTI, E. C. HORNING and O. CASTRÉN: Microanalysis of "sebum" and sebum-like materials by temperature programmed gas chromatography 368
A. KONTTINEN: Serum cholesterol independent of highly saturated dietary fats under special conditions 373
T. A. MIETTINEN: Fractionation of urinary mucosaccharides by gel filtration 380

J. GOA: Quantitative determination of four seromucoid subfractions of human serum 387
L. GARBY and L. THORÉN: Transfer of magnesium and citrate between red cells and plasma during storage in acid citrate-glucose solution (ACD) 392
BIRGITTA HAEGER-ARONSEN: Fecal porphyrins in porphyria acuta intermittens, porphyria cutanea tarda and intoxicatio plumbi 399
L. SUNDBLAD, KERSTIN WALDTON and MÄRTA WALLIN-NILSSON: Studies on orosomucoid in normal infants and children 403
K. B. BJÖRNESJÖ and B. JARNULF: Determination of iproniazid and nialamide in blood serum and urine 408

Technique and Practical Problems:

B. ISAKSSON: Simple device for homogenizing and sampling of feces in a closed system 414
B. ISAKSSON: Device for separate collection of human urine and feces 418
A. BØYUM: Collection and handling of bone marrow suspensions for intravenous use 419

No. 5.

S. SALMINEN and K. LUOMANMÄKI: Distribution of sodium and potassium in serum, cerebrospinal fluid and serum ultrafiltrate in some diseases 425
B. HYSING, L. E. DAHL and E. VARNAUSKAS: Determination of cardiac output with Cardio Green in a direct writing colorimeter 430
P. UNGER and O. RAMGREN: A new centrifuge for washing erythrocytes for the AHG (Coombs) test and other procedures 435
E. G. AKSNES: Determinations of physiological dead-space and alveolo-arterial oxygen gradients by the indirect methods of Riley and Enghoff. I. Studies on the experimental error of the method and on the variations observed in normal individuals. 443
E. KVAMME, K. KNUDSEN and LIV SUND: Chromatographic fractionation of lactic dehydrogenase from human tissues. 453
B. VESTERGAARD-BOGIND: Automatic pH regulation of cell suspensions by a gasometric pH-stat 461
H. JENNER and K. J. ÖBRINK: Determination of Fe^{55} and Fe^{59} mixtures in blood by liquid scintillation counting 466
O. EGEBERG: The effect of unspecific fever induction on the blood clotting system 471
O. EGEBERG: The effect of serum infusion on the blood clotting system 475
O. EGEBERG: A family with antihemophilic C factor (AHC = plasma thromboplastin antecedent) deficiency without bleeding tendency 478
O. EGEBERG: The effect of intramuscular blood injections on the blood clotting system 487
C.-B. LAURELL and B. LUNDH: An electrophoretic method for estimation of some β-globulins 490
E. G. AKSNES: Determinations of physiological dead-space and alveolo-arterial oxygen gradients by the indirect methods of Riley and Enghoff. II. Studies in patients with clinical, radiological and spirometric evidence of pulmonary emphysema and fibrosis 495
E. G. AKSNES: Determinations of physiological dead-space and alveolo-arterial oxygen gradients by the indirect methods of Riley and Enghoff. III. Studies in patients with pulmonary tuberculosis 507
I. NIELSEN: Electrometric determination of urea in blood and urine 513

R. BRODERSEN: Contribution to the identification of bile pigments in normal human serum 517
S. BLIX: The euglobulin method for estimation of fibrinolytic activity in streptokinase-activated plasma 528
K. AUKLAND: Spectrophotometric determination of hemoglobin oxygen saturation in small blood samples 533
T. HÄGGENDAL: On the use of strong exchange resins for determinations of small amounts of catechol amines 537
H. E. REFSUM: Hypokalemic alkalosis during recovery from compensated respiratory acidosis 545
T. LEHMANN and V. KARAMUSTAFAOGLU: Rapid differentiation of barbiturates in blood serum by thin-layer chromatography 554

Technique and Practical Problems:

T. HOLM-JENSEN: An air-sampling pipette with no dead space and with only one stopcock 559
C. J. ANDERSEN, B. NORDENTOFT JENSEN and N. RUD KEIDING: Magnesium determination by flame photometry 560
B. LAURENT: Elution of Lissamine Green from cellulose acetate electrophoresis strips 563

Letters to the Editors:

E. MAGID: Tolerance to anticoagulants during antibiotic therapy 565
J. GORMSEN and J. E. MÖLHOLM HANSEN: Protease and fibrinolytic activity 566
J. FOG, B. BUGGE-ASPERHEIM and E. JELLUM: Bilirubin-azo-pigments formed by coupling with different aromatic amines 567
Y. KONTTINEN: Some observations on the effect of thrombin on the antifibrinolytic aspect of streptokinase 568

No. 6.

E. PITKÄNEN, M. M. AIRAKSINEN, O. O. MUSTALA and J. PALOHEIMO: Observations on the specificity of the urinary 5-hydroxyindoleacetic acid determination with 1-nitroso-2-naphtol 571
A. RANDRUP: Further control and improvement of a method for determination of plasma triglyceride 578
L. GARBY and M. HJELM: Short-term assessment of red cell survival with an improved Cr^{51}-technique 581
O. SIGGAARD ANDERSEN: The first dissociation exponent of carbonic acid as a function of pH 587
O. SIGGAARD ANDERSEN: The pH-log pCO_2 acid-base nomogram revised 598
M. H. NIELSEN and N. C. NIELSEN: Spectrophotometric determination of Evans blue dye in plasma with individual correction for blank density by a modified Gablers method 605
E. ORINIUS: The relation between lung volumes and thoracic dimensions 618
P. J. CHRISTENSEN: On the determination of phenylalanine hydroxylase activity in crude liver extracts 623
C. G. BERGSTRAND, P. FÜRST, Y. LARSSON and G. STERKY: Serum haptoglobin in juvenile diabetes 629

O. STORSTEIN and A. VOLL: New prediction formulas for ventilatory measurements 633
P. OLLENDORFF: Initiation of blood clotting and glass activation followed with a three-stage technique 643
F. VOGT-LORENTZEN: Spectrophotometric determination of carbon monoxide hemoglobin in blood 648
OTTO HANSEN: Specificity of the glucose oxidase reaction and interference with the quantitative glucose oxidase-peroxidase-0-dianisidine method 653

Technique and Practical Problems:

S. RADNER: Another type of biopsy needle 656
F. NIELSEN KUDSK: A simple all-purpose electronic timer 655

Letters to the Editors:

S.-E. LINDELL, N. J. NILSSON, B.-E. ROOS and H. WESTLING: Sampling cerebral venous blood in man 66
